### **Negative & Zero Values:**

**Gross Profit:** Minimum of **-52,002.78**, indicating potential losses due to high costs or heavy discounts. This could be due to selling products at lower prices than their purchase costs.

**Profit Margin:** Has a minimum of  $-\infty$ , which suggests instances where revenue is zero or even lower than the total cost, leading to extreme negative profit margins.

**Total Sales Quantity & Sales Dollars:** Some products show zero sales, indicating they were purchased but never sold. These may be slow-moving or obsolete stock, leading to inventory inefficiencies.

### **Outliers Detected by High Standard Deviations:**

**Purchase & Actual Prices:** The maximum values (**5,681.81 & 7,499.99**) are significantly higher than the mean (**24.39 & 35.64**), indicating premium product offerings.

**Freight Cost:** Extreme variation from **0.09 to 257,032.07** suggests logistics inefficiencies, bulk shipments, or erratic shipping costs across different products.

**Stock Turnover:** Ranges from **0 to 274.5**, suggesting some products sell rapidly while others remain unsold for long periods. A value greater than **1** indicates that sales for a product exceed the purchased quantity due to older stock fulfilling orders.

### **Data Filtering**

To enhance the reliability of the insights, we removed inconsistent data points where:

- **Gross Profit  $\leq 0$**  (to exclude transactions leading to losses).
- **Profit Margin  $\leq 0$**  (to ensure analysis focuses on profitable transactions).
- **Total Sales Quantity = 0** (to eliminate inventory that was never sold).

### **Correlation Insight**

**Purchase Price vs. Total Sales Dollars & Gross Profit:** Weak correlation (**-0.012** and **-0.016**), indicating that price variations do not significantly impact sales revenue or profit.

**Total Purchase Quantity vs. Total Sales Quantity:** Strong correlation (**0.999**), confirming efficient inventory turnover.

**Profit Margin vs. Total Sales Price:** Negative correlation (**-0.179**), suggesting increasing sales prices may lead to reduced margins, possibly due to competitive pricing pressures.

**Stock Turnover vs. Gross Profit & Profit Margin:** Weak negative correlation (**-0.038** & **-0.055**), indicating that faster stock turnover does not necessarily equate to higher profitability.

## Research Questions and Key Findings

### 1) Brands for Promotional and Pricing Adjustments

#### Brands with low sales but high Profit Margins:

	Description	TotalSalesDollars	ProfitMargin
6199	Santa Rita Organic Svn Bl	9.99	66.466466
2369	Debauchery Pnt Nr	11.58	65.975820
2070	Concannon Glen Ellen Wh Zin	15.95	83.448276
2188	Crown Royal Apple	27.86	89.806174
6237	Sauza Sprklg Wild Berry Marg	27.96	82.153076
...	...	...	...
5074	Nanbu Bijin Southern Beauty	535.68	76.747312
2271	Dad's Hat Rye Whiskey	538.89	81.851584
57	A Bichot Clos Marechaudes	539.94	67.740860
6245	Sbragia Home Ranch Merlot	549.75	66.444748
3326	Goulee Cos d'Estournel 10	558.87	69.434752

198 brands exhibit lower sales but higher profit margins, which could benefit from targeted marketing, promotions, or price optimizations to increase volume without compromising profitability.

## 2) Top Vendors by Sales and Purchase contribution.

The top **10 vendors** contribute **65.69%** of total purchases, while the remaining vendors contribute only **34.31%**. This over-reliance on a few vendors may introduce risks such as supply chain disruptions, indicating a need for diversification.

Top 10 Vendor's Purchase Contribution (%)

### 3) Impact of Bulk Purchasing on Cost Savings

Vendors buying in large quantities receive a **72% lower unit cost (\$10.78 per unit vs. higher unit costs in smaller orders)**.

Bulk pricing strategies encourage larger orders, increasing total sales while maintaining profitability.

OrderSize	UnitPurchasePrice
Small	39.068186
Medium	15.486414
Large	10.777625

### 4) Identifying Vendors with Low Inventory Turnover

**Total Unsold Inventory Capital: \$2.71M**

Slow-moving inventory increases storage costs, reduces cash flow efficiency, and affects overall profitability.

Identifying vendors with low inventory turnover enables better stock management, minimizing financial strain.

	VendorName	UnsoldInventoryValue		StockTurnover
25	DIAGEO NORTH AMERICA INC	722.21K		
46	JIM BEAM BRANDS COMPANY	554.67K	ALISA CARR BEVERAGES	0.615385
68	PERNOD RICARD USA	470.63K	HIGHLAND WINE MERCHANTS LLC	0.708333
116	WILLIAM GRANT & SONS INC	401.96K	PARK STREET IMPORTS LLC	0.751306
30	E & J GALLO WINERY	228.28K	Circa Wines	0.755676
79	SAZERAC CO INC	198.44K	Dunn Wine Brokers	0.766022
11	BROWN-FORMAN CORP	177.73K	CENTEUR IMPORTS LLC	0.773953
20	CONSTELLATION BRANDS INC	133.62K	SMOKY QUARTZ DISTILLERY LLC	0.783835
61	MOET HENNESSY USA INC	126.48K	TAMWORTH DISTILLING	0.797078
77	REMY COINTREAU USA INC	118.60K	THE IMPORTED GRAPE LLC	0.807569

## 5) Profit Margin Comparison: High vs Low-Performing Vendors

**Top Vendors' Profit Margin (95% CI): (30.74%, 31.61%), Mean: 31.17%**

**Low Vendors' Profit Margin (95% CI): (40.48%, 42.62%), Mean: 41.55%**

Low-performing vendors maintain higher margins but struggle with sales volumes, indicating potential pricing inefficiencies or market reach issues.

### Actionable Insights:

- Top-performing vendors:** Optimize profitability by adjusting pricing, reducing operational costs, or offering bundled promotions.
- Low-performing vendors:** Improve marketing efforts, optimize pricing strategies, and enhance distribution networks.

## 6) Statistical Validation of Profit Margin Differences

### Hypothesis Testing:

**H<sub>0</sub> (Null Hypothesis):** No significant difference in profit margins between top and low-performing vendors.

**H<sub>1</sub> (Alternative Hypothesis):** A significant difference exists in profit margins between the two vendor groups.

**Result:** The null hypothesis is rejected, confirming that the two groups operate under distinctly different profitability models.

**Implication:** High-margin vendors may benefit from better pricing strategies, while top-selling vendors could focus on cost efficiency.

## Final Recommendations

- Re-evaluate pricing for low-sales, high-margin brands to boost sales volume without sacrificing profitability.
- **Diversify vendor partnerships** to reduce dependency on a few suppliers and mitigate supply chain risks.
- **Leverage bulk purchasing advantages** to maintain competitive pricing while optimizing inventory management.
- **Optimize slow-moving inventory** by adjusting purchase quantities, launching clearance sales, or revising storage strategies.
- **Enhance marketing and distribution strategies** for low-performing vendors to drive higher sales volumes without compromising profit margins.
- By implementing these recommendations, the company can achieve sustainable profitability, mitigate risks, and enhance overall operational efficiency.
